

Measures deafness & hard of hearing

Here you will find a list of the measures we want to implement for the System Change Camp 2025. We will endeavour to achieve all of them. But we cannot guarantee it. If you need specific support, please let us know in advance of the camp by registering. Then we can adjust accordingly. Also let us know if you are missing anything that you need to take part in the camp and we will endeavour to provide it. You can find our contact details under "Barrier-free registration".

Before the camp

Low-barrier registration

- Registration of individual support needs
 - via encrypted form:
<https://cryptpad.fr/form/#/2/form/view/aLptCttgQmld4KGfN1G1i9PhDnW+YVKBxsVFq9UuxSU/>
 - by phone: every Tuesday, 14:00-16:00 on +49 163 9799864
 - by e-mail: campfueralle@system-change-camp.org
- Possibility to specify needs such as medication refrigeration, rest requirements, stimulus reduction, physical rest or special nutrition
- Preferred places at the bed exchange

Information

- Information about the site on our website (e.g. site plan, location of quiet zones, shaded areas)
- Information about the programme on our website (incl. meal and break times)
- Support with packing through checklists
- List of barriers on our website

Arrival and departure and orientation

- Support person on arrival and departure
- Contact persons from the inclusion team on site

At the camp

Communication

- Permanent availability of the inclusion team during the day and evening for enquiries, support and arranging assistance
- Assistance for everyday life can help with communication (probably not DGS)
- METACOM materials for communication support can be borrowed
- Sunflower buttons as a voluntary identification mark for invisible disabilities
- Buttons for "I feel like sharing" and "I don't want to be contacted"
- Announcements are also always communicated in a Telegram group

- Carer as support in dangerous situations
- If desired: Buddy as a social and emotional reference person

Programme

- Induction loops for hearing aids/ CIs to which the speaker's speech is transmitted
- Automated subtitling
- Sensitisation of speakers to speak slowly and clearly. We encourage the use of methods with a variety of expressive possibilities (e.g. painting, showing, writing). Spoken content should be supported by visual elements.
- Speakers and participants are sensitised to the importance of not speaking out of turn. Hand signals in plenary sessions, such as the need for pauses, language comprehension or speaking contributions, are explained and used in group discussions.
- Reserved seats in the front row

After the Camp

Feedback

- Opportunities for feedback via email or telephone so that we can improve our offer in subsequent years

⚠ Remaining barriers

- No full interpretation into easy language, sign language or foreign languages-
- Not all participants & helpers are trained in accessible communication
- Much of the information is in written form
- Loudness or stimuli at the camp can make communication difficult
- Everyday assistance not always immediately available
